

SHERLIC

SYSTEM

ECONO INJECTAIR SYSTEM AND INJECTAIR PLUS

Preheated air is pushed through 12 to 16 jets located at the bottom and the back of the bathtub, giving a deep and uniform massage. Twenty minutes after the end of the massage, the system automatically starts up again for one minute in order to drain the heads of the jets and to restore the system's sanitary conditions. SHERLIC introduces you to the new millennium turbine with silencer. Injectair and injectair econo bathtubs only have 63 decibels.

WHIRLPOOL SYSTEM

Water is pumped and circulates through 6 jets in single bathtubs and 8 jets in double bathtubs. These jets are located on the sides and the back of the bathtub and provide a beneficial massage. The power of the massage can be regulated by opening or closing the controls that let air in.

- Pulsation cycle
- 3/4 HP pump with variable speed
- 6 or 8 colour-coordinated movable jets
- 2 air inlet controls
- 1 suction

COMBINATION WHIRLPOOL AND INJECTAIR SYSTEM

The combination of the whirlpool system and injectair plus provides a truly unique massage. It's a win-win situation.

Standard equipment

DUO combination

- Whirlpool
- 3/4 HP pump
- 6 or 8 jets movable jets
- 2 air inlet controls
- 1 suction
- 1 electronic variable-speed control
- Injectair Plus
- 1 hot air blower with 300-watt heating element
- 14 or 16 jets (white, bone, grey, biscuit (off-white))
- Pulsation cycle
- Automatic drying cycle
- Variable electronic duo control

Variable Injectair combination control

Supra

- 43 to 58 air jets
- One 300W warm air blower
- 1 electronic variable speed control
- Pulse and wave cycle
- Water detector that starts the drying cycle

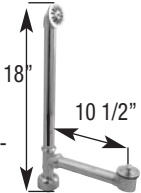

Supra Plus

- 53 to 72 air jets
- 2 300W warm air blower
- 1 electronic variable speed control, double action
- Pulse and wave cycle
- Water detector that starts the drying cycle

SHERLIC

SYSTEM

OPTIONS

- Adjustable 100% spa jets  Jet spa rotary whirlpool  Jet spa fitting whirlpool
- Ambient lights 3 1/4" in diameter with key 
- Flexible extension pipe for blower 
- Electronic control cable extension, length 12' (3,66 m) 
- Acrylic resin handles 8" and 12" 
- Automatic polypropylene drain 
- D 1412C Drain for free-standing tub 

JET-PLUS SYSTEM

COMPLETE DORSAL MASSAGE

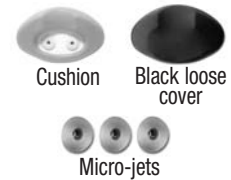

Two jets inside the cushion provide you with a massage at the base of the neck and three micro-jets complete the back massage. The JET-PLUS system ensures you a neck massage without having water splash outside the tub. A mechanism allows the opening and the closing of JET-PLUS system according to your desire.

Neck massage system

OPTION ON THE WHIRLPOOL AND THE DUO COMBINATION

1A • JET-PLUS cushion with two integrated jets.

1B • JET-PLUS cushion with two integrated jets plus three micro-jets at the lower-back level.

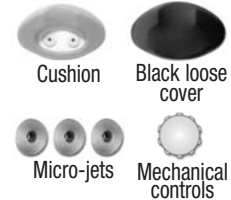

Neck massage system with mechanical control

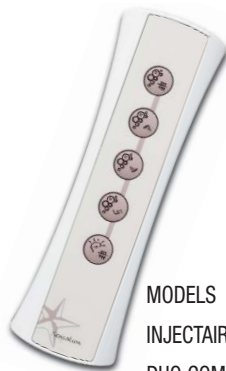

OPTION ON THE WHIRLPOOL AND THE DUO COMBINATION

2A • JET-PLUS cushion with two integrated jets and mechanical controls.

2B • JET-PLUS cushion with two integrated jets plus three micro-jets at the lower-back level and mechanical control.

REMOTE CONTROL

MODELS
INJECTAIR TL1
DUO COMBINATION TLC

The remote control for injectair and duo combination bathtubs facilitates the installation of faucets. Two magnets on the exterior wall of the bathtub hold the remote control in place. The remote is water-resistant. It can be used in the bathtub and floats on the surface of the water.
